Vita João Biehl,2013-05-01 Zones of social abandonment are emerging everywhere in Brazil's big cities—places like Vita, where the unwanted, the mentally ill, the sick, and the homeless are left to die. This haunting, unforgettable story centers on a young woman named Catarina, increasingly paralyzed and said to be mad, living out her time at Vita. Anthropologist João Biehl leads a detective-like journey to know Catarina; to unravel the cryptic, poetic words that are part of the dictionary she is compiling; and to trace the complex network of family, medicine, state, and economy in which her abandonment and pathology took form. An instant classic, Vita has been widely acclaimed for its bold fieldwork, theoretical innovation, and literary force. Reflecting on how Catarina's life story continues, this updated edition offers the reader a powerful new afterword and gripping new photographs following Biehl and Eskerod's return to Vita. Anthropology at its finest, Vita is essential reading for anyone who is grappling with how to understand the conditions of life, thought, and ethics in the contemporary world.

CEO Branding Marc Fetscherin,2015-06-19 CEO Branding advances our understanding of the importance and impact that CEOs have on companies. In recent years, there has been a growing body of interdisciplinary literature on this powerful aspect of branding, and Fetscherin has invited a leading panel of international scholars and practitioners to contribute original chapters in their area of expertise. The book introduces the concept of the CEO as a brand, and outlines the 4Ps of this branding mix - the CEO (person), personality, prestige (reputation), and performance. It discusses the CEO branding process, and demonstrates the many ways in which this 'human brand' affects the company in financial terms (such as

performance, profit, and stock returns), as well as non-financial terms (reputation, trust, and firm strategy). The book also includes 'lessons learned' and many examples that illustrate how companies can measure and manage the CEO brand. This comprehensive, authoritative volume will give students, researchers, marketing and communication managers, and CEOs themselves a thorough understanding of all aspects of the CEO brand. A must read for any CEO who is serious about developing, managing and measuring their own brand. For more information, visit www.ceobranding.org

How to Read Nancy Paul Karasik, Mark Newgarden, 2017-10-31 Everything that you need to know about reading, making, and understanding comics can be found in a single Nancy strip by Ernie Bushmiller from August 8, 1959. Paul Karasik and Mark Newgarden's groundbreaking work *How to Read Nancy* ingeniously isolates the separate building blocks of the language of comics through the deconstruction of a single strip. No other book on comics has taken such a simple yet methodical approach to laying bare how the comics medium really works. No other book of any kind has taken a single work by any artist and minutely (and entertainingly) pulled it apart like this. *How to Read Nancy* is a completely new approach towards deep-reading art. In addition, *How to Read Nancy* is a thoroughly researched history of how comics are made, from their creation at the drawing board to their ultimate destination at the bookstore. Textbook, art book, monogram, dissection, *How to Read Nancy* is a game changer in understanding how the "simplest" drawings grab us and never leave. Perfect for students, academics, scholars, and casual fans.

Cultural Chaos Brian McNair, 2006-05-05 With examples drawn from media coverage of the War on Terror, the 2003 invasion of Iraq, Hurricane Katrina and the London underground bombings, *Cultural Chaos* explores the changing relationship between journalism and power in an increasingly globalised news culture. In this new text, Brian McNair examines the processes of cultural, geographic and political dissolution in the post-Cold War era and the rapid evolution of information and communication technologies. He investigates the impact of these trends on domestic and international journalism and on political processes in democratic and authoritarian societies across the world. Written in a lively and accessible style, *Cultural Chaos* provides students with an overview of the evolution of the sociology of journalism, a critical review of current thinking within media studies and an argument for a revision and renewal of the paradigms that have dominated the field since the early twentieth century. Separate chapters are devoted to new developments such as the rise of the blogosphere and satellite television news and their impact on journalism more generally. *Cultural Chaos* will be essential reading for all those interested in the emerging globalised news culture of the twenty-first century.

The New Neurotology Pedro Luiz Mangabeira Albernaz, Francisco Zuma e Maia, Sergio Carmona, Renato Valério Rodrigues Cal, Guillermo Zalazar, 2019-04-05 Neurotology is a branch of medicine that focuses on diagnosing and treating neurological conditions of the inner ear and related structures. There have been many recent advances in neurotology that have been published in general medicine, otolaryngology and neurology journals. This comprehensive book will aggregate

this information to provide a more complete picture of the state of the field and will include the authors' own clinical experience. There is a recent marked increase in interest in neurotology, manifested by the clinical experiences and research-publication work of otolaryngologists, neurologists, neuro-ophthalmologists, audiologists and physiotherapists. As a result, this will be a completely state-of-the-art work that includes all up-to-date neurophysiological data related to the vestibular system. It has been estimated that 10% of patients that present at an emergency clinic have vestibular disorders, including vertigo, and these disorders are frequently a cause of falls in elderly patients. On the other hand, many physicians treat their patients with vertigo with vestibular blockers, which treat the symptoms but do not cure the disorders. We feel that it is important to supply a source of information on the vestibular system and balance disorders, and this title will do that in a comprehensive manner. This title will be an ideal reference for the diagnosis and treatment of vestibular disorders for otolaryngologists, neurologists, neuro-ophthalmologists, audiologists and physical therapists.

Changing Journalism Peter Lee-Wright, Angela Phillips, Tamara Witschge, 2011-07-14 Journalism is in transition. Irrevocable decisions are being made, often based on flimsy evidence, which could change not only the future of journalism, but also the future of democracy. This book, based on extensive research, provides the opportunity to reflect upon these decisions and considers how journalism could change for the better and for the good of democracy. It covers: the business landscape work and employment the regulatory framework audiences and interaction the impact of technology on practices and content ethics in a converged world The book analyses research in both national and local journalism, broadcast, newspaper and online journalism, broadsheet and tabloid, drawing comparisons between the different outlets in the field of news journalism, making this essential reading for scholars and students of journalism and media studies.

Changing the News Wilson Lowrey, Peter J. Gade, 2012-01-25 Changing the News examines the difficulties in changing news processes and practices in response to the evolving circumstances and struggles of the journalism industry. The editors have put together this volume to demonstrate why the prescriptions employed to salvage the journalism industry to date haven't worked, and to explain how constraints and pressures have influenced the field's responses to challenges in an uncertain, changing environment. If journalism is to adjust and thrive, the following questions need answers: Why do journalists and news organizations respond to uncertainties in the ways they do? What forces and structures constrain these responses? What social and cultural contexts should we take into account when we judge whether or not journalism successfully responds and adapts? The book tackles these questions from varying perspectives and levels of analysis, through chapters by scholars of news sociology and media management. Changing the News details the forces that shape and challenge journalism and journalistic culture, and explains why journalists and their organizations respond to troubles, challenges and uncertainties in the way they do.

Chocolate, Politics and Peace-Building Gwen Burnyeat, 2018-01-08 This book tells the story of the Peace Community

of San José de Apartadó, an emblematic grassroots social movement of peasant farmers, who unusually declared themselves 'neutral' to Colombia's internal armed conflict, in the north-west region of Urabá. It reveals two core narratives in the Community's collective identity, which Burnyeat calls the 'radical' and the 'organic' narratives. These refer to the historically-constituted interpretative frameworks according to which they perceive respectively the Colombian state, and their relationship with their natural and social environments. Together, these two narratives form an 'Alternative Community' collective identity, comprising a distinctive conception of grassroots peace-building. This study, centered on the Community's socio-economic cacao-farming project, offers an innovative way of approaching victims' organizations and social movements through critical, post-modern politics and anthropology. It will become essential reading to Latin American ethnographers and historians, and all interested in conflict resolution and transitional justice. The Vanishing Newspaper [2nd Ed] Philip Meyer, 2009-09 In this edition, Meyer's analysis of the correlation between newspaper quality and profitability is updated and applied to recent developments in the newspaper industry. Meyer argues that understanding the relationship between quality and profit is central to sustaining journalistic excellence and preserving journalism's unique social functions. -- Provided by the publisher.

Network Journalism Ansgard Heinrich, 2011-04-26 Drawing on current theoretical debates in journalism studies, and grounded in empirical research, Heinrich here analyzes the interplay between journalistic practice and processes of globalization and digitalization. She argues that a new kind of journalism is emerging, characterized by an increasingly global flow of news as well as a growing number of news deliverers. Within this transformed news sphere the roles of journalistic outlets change. They become nodes, arranged in a dense net of information gatherers, producers, and disseminators. The interactive connections among these news providers constitute what Heinrich calls the sphere of network journalism.

Radical Democracy and the Internet Lincoln Dahlberg, Eugenia Siapera, 2007-05-22 Radical Democracy and the Internet provides a systematic and mutual interrogation of radical democratic theory and Internet practice. Contributors critically examine a range of radical democratic theories in relation to online communication, from deliberative to agonistic to autonomist Marxist, and explore how such communication may be advancing democracy beyond what is conceptualized and practised within present liberal-capitalist political contexts. The result is an important contribution to both democratic theory and new media studies, and essential reading in politics, media studies, communications, and sociology.

Alternative and Activist New Media Leah Lievrouw, 2013-05-06 Alternative and Activist New Media provides a rich and accessible overview of the ways in which activists, artists, and citizen groups around the world use new media and information technologies to gain visibility and voice, present alternative or marginal views, share their own DIY information

systems and content, and otherwise resist, talk back to, or confront dominant media culture. Today, a lively and contentious cycle of capture, cooptation, and subversion of information, content, and system design marks the relationship between the mainstream 'center' and the interactive, participatory 'edges' of media culture. Five principal forms of alternative and activist new media projects are introduced, including the characteristics that make them different from more conventional media forms and content. The book traces the historical roots of these projects in alternative media, social movements, and activist art, including analyses of key case studies and links to relevant electronic resources. *Alternative and Activist New Media* will be a useful addition to any course on new media and society, and essential for readers interested in new media activism.

Television and Common Knowledge Jostein Gripstrud, 2002-01-22 *Television and Common Knowledge* considers how television is and can be a vehicle for well-informed citizenship in a fragmented modern society. Grouped into thematic sections, contributors first examine how common knowledge is assumed and produced across the huge social, cultural and geographical gulfs that characterise modern society, and investigate the role of television as the primary medium for the production and dissemination of knowledge. Later contributions concentrate on specific tv genres such as news, documentary, political discussions, and popular science programmes, considering the changing ways in which they attempt to inform audiences, and how they are actually made meaningful by viewers.

Marilyn Susan Bernard, Bruno Bernard, 2011 2012 is the 50th anniversary of Marilyn Monroe's death, and this lavishly illustrated book celebrates her enduring beauty through photographs--many never before published--by legendary Hollywood photographer Bernard, known for his iconic photograph of Marilyn standing over the subway grate in a billowing white dress.

The Invention of Journalism Ethics Stephen John Anthony Ward, 2015 Does objectivity exist in the news media? In *The Invention of Journalism Ethics*, Stephen Ward argues that given the current emphasis on interpretation, analysis, and perspective, journalists and the public need a new theory of objectivity. He explores the varied ethical assertions of journalists over the past few centuries, focusing on the changing relationship between journalist and audience. This historical analysis leads to an innovative theory of pragmatic objectivity that enables journalists and the public to recognize and avoid biased and unbalanced reporting. Ward convincingly demonstrates that journalistic objectivity is not a set of absolute standards but the same fallible but reasonable objectivity used for making decisions in other professions and public institutions. Considered a classic in the field since its first publication in 2004, this second edition includes new chapters that bring the book up to speed with journalism ethics in the twenty-first century by focusing on the growing dominance of online

journalism and calling for a radical approach to journalism ethics reform. Ward also addresses important developments that have occurred in the last decade, including the emergence of digital journalism ethics and global journalism ethics.

The Architecture Machine Teresa Fankhänel, Andres Lepik, 2020-07-20 Today, it is hard to imagine the everyday work in an architectural practice without computers. Bits and bytes play an important role in the design and presentation of architecture. The book, which is published in the context of an exhibition of the same name of the Architekturmuseum der TUM at the Pinakothek der Moderne in Munich (October 14, 2020 to January 10, 2021), for the first time considers - in depth - the development of the digital in architecture. In four chapters, it recounts this intriguing history from its beginnings in the 1950s through to today and presents the computer as a drawing machine, as a design tool, as a medium for telling stories, and as an interactive communication platform. The basic underlying question is simple: Has the computer changed architecture? And if so, by how much?
