**Rebellion, Revolution, and Armed Force** D.E.H. Russell,2013-09-03 Rebellion, Revolution, and Armed Force: A Comparative Study of Fifteen Countries with Special Emphasis on Cuba and South Africa examines the role of armed forces in rebellion. This book raises and discusses the general question relating to oppression. Organized into eight chapters, this book begins with an overview of relevant literature on rebellion and revolution. This text then discusses the concept of rebellion and considers its relationship to revolution. Other chapters critically evaluate the literature on revolution and rebellion. This book discusses as well the methods used for selecting the seven cases of successful and seven cases of unsuccessful rebellion based on data sources. The final chapter summarizes and examines each of the unsuccessful cases of rebellion in Austria, Cuba, Colombia, Italy, Honduras, Spain, and Burma. This book is a valuable resource for historians, sociologists, teachers, researchers, and students.

*Essentials of Restenosis* Henricus J. Duckers,Elizabeth G. Nabel,Patrick W. Serruys,2007-11-13 Leading interventional cardiologists, including Patrick Serruys, provide the gold-standard reference on the treatment of restenosis for interventional cardiologists. Dr. Serruys, who pioneered the use of drug-eluting stents, and other pioneers in the field, cover everything from non-invasive imaging, to eluting stents, to brachytherapy through to the latest molecular biology-based treatments including antisense, stem cells and gene therapy.

*Drug-Eluting Stents* Christopher J. White,2005-06-30 The cure for restenosis has been the Holy Grail of interventional cardiology since the advent of coronary angioplasty in the late 1970s. The development of stents improved the durability of angioplasty, but in-stent restenosis was a major problem for patients and the physicians. To deliver drugs locally on stents that prevent restenosis is a revolutionary advance. Percutaneous revascularization technology has leaped forward, dramatically altering clinical practices, with what may be the single most important advance in the history of cardiology. There are new delivery platforms and new drugs currently being tested. Despite the continuing advancement, there was a need to collate in a single text, information on drug eluting stents for coronary disease. Chris White and colleagues have put

together a logically organized text that progresses from theory to practice, and addresses pharmacologic, technical and strategic issues as they relate to the placement of coronary drug-eluting stents.

**Essential Interventional Cardiology E-Book** Michael S. Norell,John Perrins,Berhard Meier,A. Michael Lincoff,2008-07-04 This title is directed primarily towards health care professionals outside of the United States. This book has been prepared by professionals working in the UK. It covers the basic principles and practice of interventional cardiology, vascular and non-vascular, written specifically for the general cardiologist. Designed to facilitate easy access to key information, it contains numerous line illustrations, diagrams, graphs, and charts. The entire spectrum of interventional cardiology is covered in an easy-to-read format. In this new edition are fifteen new chapters written by experts from around the world. The excellent appendix of trials in interventional cardiology has been fully updated making this the best available source on how to apply trials to clinical practice. Includes editors and contributors from the US and Europe for a truly international perspective. Begins each chapter with 6-10 key points written in bullet format that summarize important concepts in the chapter, making reference a snap. Includes extensive coverage of new technologies for interventional cardiology, including lasers, cutting balloons, and distal protection to keep you completely current. Covers high problem areas for intervention, including new material on chronic total occlusions, bifurcation lesions and PCI in small vessels. Adds a new section on peripheral vascular intervention including the new development areas for interventional cardiologists like carotid, renal and lower extremity. Contains new information on hot topics such as ASD, PFO closure, and aortic valve

intervention.

Cities, Diversity and Ethnicity Martin Bulmer, John Solomos, 2017-10-02 This volume brings together a variety of studies on the question of cities, ethnicity and diversity. Contributions cover various facets of life in contemporary cities, ranging from the role which street markets play in diverse neighbourhoods, to everyday multiculturalism in a specific street, the role of community and hometown associations among migrant communities, expressions of ethnicity in urban neighbourhoods, and the changing dynamics of integration and community cohesion. This book will be of interest to those who are concerned with developing a better understanding of how urban communities are being transformed by the development of new patterns of migration and ethnic mobilisation. With contributions from a wide range of scholarly and national backgrounds, each chapter helps to provide an overview both of current trends and of historical patterns and processes. Collectively they provide important insights into the shifting patterns of community and identity in increasingly diverse communities and neighbourhoods. This book was originally published as a special issue of Ethnic and Racial Studies.

**Treatment of Non-infectious Uveitis** Phoebe Lin, Eric Suhler, 2019-09-12 This unique, comprehensive book provides a much-needed reference on the treatment and management of non-infectious uveitis. Carefully designed, Treatment of Non-infectious Uveitis is the first book of its kind to provide an in-depth, clinically-relevant, expert-driven resource for ophthalmologists focusing on modalities of uveitis treatment, their mechanism of action, dosing, and side effects. Each chapter provides an introduction, mechanism of action, indication, dosage, side effects, and efficacy summaries from clinical trials and other published literature. Topics range from topical treatment, to locally administered therapy including drug-releasing implants, to systemic immunosuppressive treatments both tried and new, as well as surgical management, with each chapter highlighting important practice pearls as well as easy-reference dosing tables, side effects, and lab monitoring pertinent to the agents discussed. The book concludes with a discussion of novel approaches to the treatment of non-infectious uveitis, and special considerations when treating uveitis in the pediatric patient. The majority of patients with non-infectious uveitis are treated by comprehensive ophthalmologists, many of whom are less familiar with established treatment guidelines outlining the role of corticosteroids and immunomodulatory therapy. While the non-specialist, resident, or fellow is sure to benefit from this one-stop guide to uveitis treatment, retina and uveitis specialists alike will also appreciate the practice tips and thorough coverage of this expertly-written reference. Treatment of Non-infectious Uveitis is the ideal reference for all ophthalmologists who seek to improve their understanding of the causes of uveitis and learn how to best treat this condition.

Strategic Approaches in Coronary Intervention Stephen Geoffrey Ellis, David R. Holmes, 2006 Updated to include the

newest devices and procedures, this practical reference is a clinically oriented guide to interventional cardiology. Chapters by the foremost experts present step-by-step approaches to specific clinical problems and offer guidelines for selecting the most appropriate device and technique. The authors' recommendations are backed by their extensive experience and by evidence-based clinical trials. This Third Edition describes the latest stents and stenting procedures—including local drug delivery with coated stents—and provides state-of-the-art information on local myocyte injection, distal protection devices, peripheral vascular intervention, and new adjunctive therapies. The concluding chapter previews future developments in the field.
